This is in response to Applicant's amendment filed on July 25 and August 28, 2006 in which claims 1-3, 7-11, 17, 18, 21-22, 46-55 were amended; claims 4-6, 12-16, 19-20, 23-45 were canceled. Thus, claims 1-3, 7-11, 17-18, 21-22 and 46-55 were presented for examination.

Status of Claims

Claims 1-3, 7-11, 17-18, 21-22 and 46-55 are pending. Claims 4-6, 12-16, 19-20, 23-45 are canceled.

Specification

Claims 1-3, 7-11, 17-18, 21-22 and 46-55 (especially the claims filed on August 6, 2006) are objected to because of the following informalities: The claims are replete with grammatical errors. For instance, claim 1 recites "searchi"; claim 7 recites "indicatto"; "that". Appropriate correction is required. Further, because the claims are replete with grammatical errors, the Applicant is required to fully review the specification and claims to correct any potential grammatical errors.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3, 7-11, 17-18, 21-22 and 46-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly

Art Unit: 2161

claim the subject matter which applicant regards as the invention. In particular, claims 1, 10 recite "an ability". It is not clear whether the ability recited in the claim encompassed a human ability as well.

Claim 10 recites "him/her; claim 7, 21 "that"; the pronouns him and her render the claim indefinite. Only what is being referred by him or her should be set forth in the claim.

The term "if" in claim 1-3, 7-11, 17-18, 21-22 and 46-55 is a relative term which renders the claim indefinite. The term "if" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. These recitations, therefore renders the claim indefinite.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 2161

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3, 7-11, 17-18, 21-22 and 46-55 are provisionally rejected on the ground of nonstatutory double patenting over claims 1-101 are of copending Application No. 10/328,088. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: A system for searching, finding and contacting dates on the Internet in instant messaging networks.

Remarks

The Double patenting rejection remains since a Terminal Disclaimer was not filed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
